ABOUT ME

Motivated 2nd-year AI/ML undergraduate aiming to build strong foundations in machine learning, data structures, and applied AI systems. Seeking internships and research-oriented opportunities to align academic learning with real-world industry and higher-studies requirements.

VISION & MARKET ALIGNMENT:

Target Dream Organizations

- Google
- Microsoft
- Amazon
- TCS

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sec ut labore et dolore magna aliqua. Ut enim ad minim veniam, ullamco laboris nisi ut aliquip ex ea commodo consequat.

Expected Compensation:

Entry-level target: ₹10–12 LPA

CORE PROJECTS:

Student Performance Prediction System

- Used: Python, Pandas, Scikit-learn
- Model Accuracy: ~88%
- Impact: Identified key academic risk factors using ML classification

2. Spam Email Detection:

- Used: NLP (TF-IDF), Naive Bayes
- Accuracy: ~90%
- Optimized preprocessing to reduce false positives

CROSS-DOMAIN UNDERSTANDING

- Strong understanding of DSA fundamentals (arrays, linked lists, stacks, queues)
- Aware of hardware constraints like:
- Memory usage
- Execution time
- CPU vs GPU computation

SKILLS

Mandatory Technical Skills

- Python – ★★★★☆ (7/10)
- Machine Learning Algorithms – ★★★☆☆ (6/10)
- Data Structures & Algorithms – ★★★☆☆ (6/10)
- SQL & Data Handling – ★★★☆☆ (6/10)

AI-DRIVEN ENGINEERING TOOLS:

- ChatGPT – debugging & code optimization
- GitHub Copilot – faster coding
- Kaggle – datasets & benchmarking

RESULT:

- Reduced development time by ~30%
- Improved code readability and experimentation speed

HARDWARE-AWARE SOFTWARE:

- No CUDA/FPGA optimization yet
- Identified bottlenecks:
- High training time on CPU
- Large model size
- Future plan: GPU-based model training & TensorFlow optimization

INNOVATION & RESEARCH:

PROBLEM SOLVING FOCUS:

- Academic performance analytics using AI
- Healthcare & education datasets (future scope)

RESEARCH INTEREST AREAS:

- Applied Machine Learning
- Deep Learning for prediction systems

(Publication & patent work planned in 3rd year)

EXTERNAL VALIDATION:

COMPETITIVE PRACTICE:

- Solved ~150+ aptitude & DSA problems
- Platforms: LeetCode (Beginner–Intermediate)

LEADERSHIP & IMPACT

TEAM EXPERIENCE:

- Worked in 3–4 member project teams
- Contributed to ML model building & documentation

SOCIAL IMPACT PROJECT:

- Student performance analysis system
- Potential to assist academic counselors
- Impacted ~50+ sample users (dataset-based)

SELF-IMPROVEMENT PLAN:

GATE 2027 TARGET:

- Target Score: 600+
- Daily study: 2–3 hours (DSA + ML basics)

18-MONTH GROWTH PLAN:

- Strengthen DSA & ML fundamentals
- Publish at least 1 research paper
- Achieve internship by 3rd year
- Build 5 industry-level ML projects
